

iRSM Receives Special Award

We are pleased to announce that iRSM was the recipient of the 2008 ASTech Foundation Special Award.

The 19th Annual Alberta Science and Technology (ASTech) Awards Gala was held on Friday, October 24 at the Shaw Conference Centre. The gala recognizes the achievements of Albertan innovators across a range of fields including science and technology, outstanding community contributions, and excellence in scientific public awareness and journalism. The ASTech Leadership Foundation was created to celebrate and promote the achievements of Alberta's scientific and technological communities.

From a small nucleus of concentrated expertise in Alberta, iRSM has developed extensive national and international knowledge networks collaborating in clinical, research and teaching activities that benefit patients the world over. This wouldn't be possible without the hard work and determination of the founders, Dr. John Wolfaardt and Dr. Gordon Wilkes; the entire iRSM staff; and our partners at Alberta Health Services, Caritas Health Group and the University of Alberta.

We would like to thank you for your ongoing support of iRSM and we look forward to sharing continued success in the future!
